

# 4-H DTV Team

*Helping you tune into the 2009 broadcasting change.*

## **Will your TV work after February 17, 2009?**

**Contact your local 4-H DTV Team to help you prepare!**

On February 17, 2009, United States television stations will switch all broadcasting to digital. After the switch, televisions that use rooftop and “rabbit ear” antennas to receive a signal will not work without a converter box, which will translate the new signal. In order to help people prepare for the change, the government is providing free coupons to offset the cost of purchasing converter boxes.

Minnesota 4-H has committed to helping Minnesotans prepare for the DTV change. 4-H DTV Teams of youth and adults have committed to educate and serve their communities regarding DTV.

To learn more about DTV, and what you need to do to make sure your TV works after February 17, 2009, contact your local 4-H DTV Team or attend the event listed below:
