### **PRIORITIES IN DETERMINING FUNDING:**

1. Increasing the number of youth involved in 4-H (Grow Green) while developing youth competencies and meeting most of the eight essential needs of youth\*\*
2. Strong evidence of how private funding will leverage other resources.
3. Requests should have application to the entire state or region.
4. “Learning by doing” youth programs that involve caring staff, adults and youth.
5. Programs that allow monitoring and measuring reportable results.
6. Programs that reach out to new and diverse youth and adult audiences.
7. Programs soundly grounded in research and youth development principles.
8. Faculty and/or leaders that are knowledgeable, able and available to lead.

\*\*The 8 essential needs of youth are: 1) Youth feel physically and emotionally safe; 2) Youth experience belonging and ownership; 3) Youth develop self-worth; 4) Youth discuss conflicting values and form their own; 7) Youth feel the pride and accountability that comes with mastery; and 8) Youth expand their capacity to enjoy life and know that success is possible.
